STUDIO

MASK

given to the healing path I'm going through, my immune system is compromised so I will wear the FFP2 mask most of the time. if you also want to use the mask, it's a much appreciated gesture^_^

COMPANION: only one, who arrives with you leaves with you and if he doesn't arrive with you he can no longer arrive

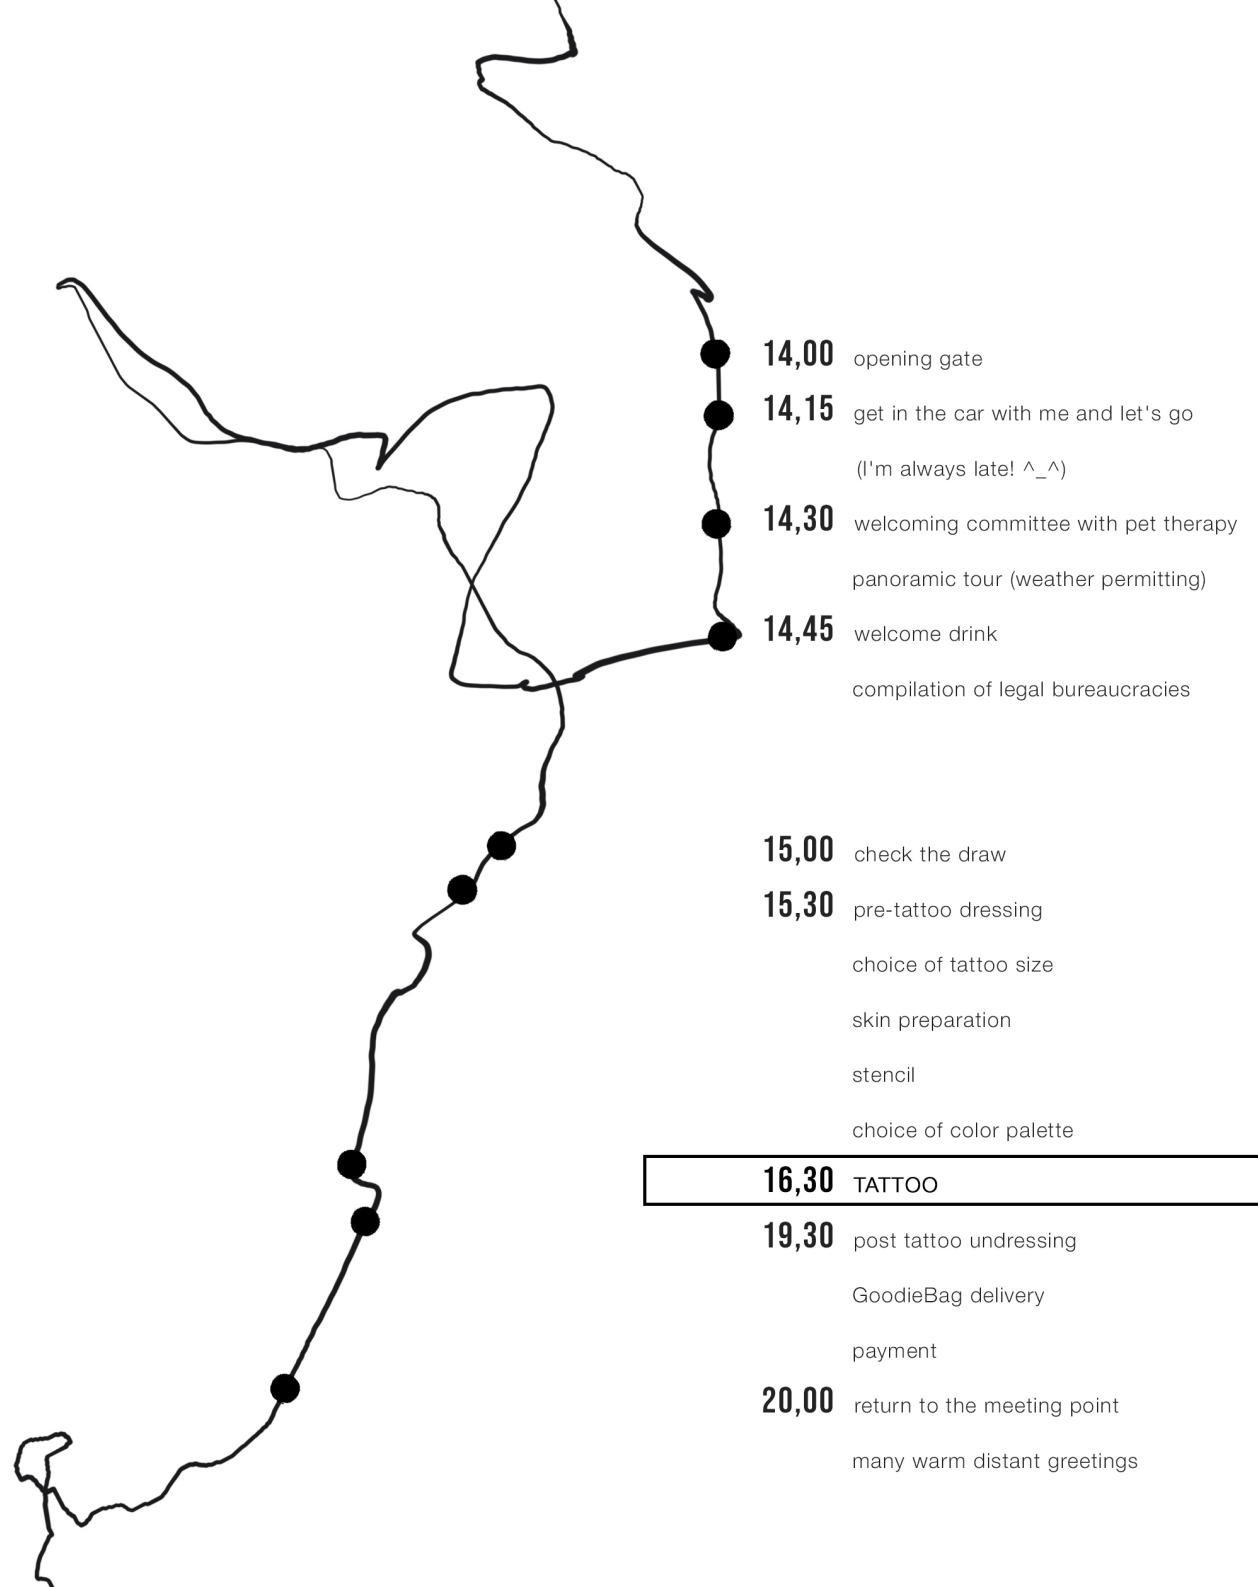

CHILDREN need a lot of attention all to themselves and there are very few entertainment options to keep them busy on the top of the hill, so it is NOT permitted to bring children under 16 with you. Tattooing is a delicate practice and requires a lot of concentration from both sides ^_^

ANIMALS: the Rock House is a #dogfriendly studio, you will meet three trotting dogs, but if you are afraid of dogs I will avoid you meeting ^_^
NO OTHER ANIMALS ARE ALLOWED in the studio, the puppets are territorial and do not accept invasions of their territory

it will be a day dedicated to you and only you, and everything else outside

5 THINGS TO DO

01

BRING A SNACK

because you are not SUPERMAN unfortunately and your body may need to supplement sugars to keep your blood sugar high

02

A BEAUTIFUL SHOWER

when you enter a tattoo studio you immediately notice the cleanliness, the smell and the aesthetics of the place and of the tattoo artist... well, it's mutual

03

BRING WITH YOU A PAINKILLER

one of those simple, light ones that you take in case of a headache or something; it's not a hymn to the use of drugs, I'm not really the type, but it's a spare tire to carry with you ^_^

04

DO I NEED TO TAKE OFF HAIR?

YES, between 24h and 48h before the appointment so as not to arrive with irritated skin

05

SLEEP

you need to arrive in the best physical condition possible cause your body is about to suffer an injury

5 THINGS

NON

TO DO

Loading...

NO ALCOHOL OR DRUGS

first of all, if you are not able to understand and want you cannot get a tattoo, the law says so, that bitch. then - worse - alcohol and drugs are vasodilators and blood thinners and you are about to injure yourself, which doesn't help

NO TIGHT CLOTHES

the body reacts to a tattoo by swelling, sometimes a lot, and a tight dress may no longer fit

NO TANNED OR IRRITATED SKIN

tanned skin is totally against a large tattoo, much less a colored one; tanned skin becomes irritated, swollen and bleeds much more easily, endangering the final result

NO TO FASTING

because we don't want fainting due to drops in sugar or blood pressure; your body will work a lot and therefore needs energy

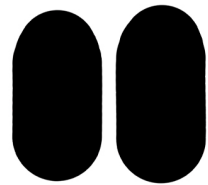

NO STRESS

always keep yourself longer than expected because the tattoo you are about to get will remain for life and must be done calmly, like all things done well
